NEW ATTRACTIONS EDMONTON EXHIBITION

Very Large Attendance from Country Districts is Anticipated

With new attractions and the best midway obtainable, and every inch of space allotted to merchants' and manufacturers' exhibits, the Edmonton Exhibition, which opens on July 15th, promises much entertainment to visitors.

There will be large new federal government exhibits—relief maps of Edmonton and district, of great interest to settlers as they show drainage possibilities, etc. — a new Government Fruit exhibit and the National Dairy Exhibit. This year, for the first time in some years, the automobile dealers are making a big display of the new models. One of the merchants' exhibits which will be of interest to women is a demonstration of new home sewing machines. A baby clinic will be

held by the Provincial Health Department to which parents are invited to bring all children of unsound health. Hundreds of mothers take advantage of the weekly baby clinic. The exhibit is free, but the country parents have not such an opportunity to see the latest of these free clinics.

The attraction is the best that can be secured, and, in addition to the grand stand area, will include running horse races, auto races, chariot races, Roman standing area, relay races and fireworks, as well as many special food features.

With a free camp ground for motor vehicles, for which the Exhibition management provides tents or cover if desired, and with extensive plans of horse-and-carriage, many visitors from outside points are expected.

**"My Hands Trembled
and I Could Not Sleep"**

Mr. Thomas Henry, Beaufort, Ont., writes—

"When I began taking Dr. Chase's Nerve Food, I was so nervous that when I picked up a cup of tea my hand would tremble like a leaf. I could not sleep well, could not remember things, and there were also sharp pains through my body when taking seven bottles of Dr. Chase's Nerve Food. However, I am a perfect health."

Red Footwear is Hazard to Health

Cause of Large Percentage of Itches
By Kathleen

It is a common sight to see a person with a red, itchy foot. This is often the result of wearing red footwear. The red color is caused by the use of red dyes in the leather. These dyes are often of a low quality and can cause a severe allergic reaction in some people. The result is a red, itchy foot that can be very uncomfortable. It is important to be aware of this danger and to choose footwear that is made of high quality materials and does not contain red dyes.

Mothers' Best Friend In Rearing Children

By Kathleen

There is no doubt that a mother's best friend in rearing her children is a good book. A good book can provide a mother with the knowledge and wisdom she needs to raise her children properly. It can also provide her with the comfort and support she needs when she is feeling overwhelmed. There are many good books available on the subject of child rearing, and every mother should have a few of them on her shelf. They are truly a mother's best friend.

Mrs. Peter A. Palmer, Salt Burn, Sask., writes:

D. O'Shea's Cream is the completely successful treatment for eczema and pruritus. I have used it for many months, and it has cured my skin. A few applications were all that was necessary to cure me. The Cream changed my skin into a beautiful delicate complexion. I had spoken great deal since I was in a hospital for my skin trouble. Ladies, we have cured you. D. O'Shea's Cream is the answer. I feel my skin is now like satin.

King Edward's Thoughtfulness
Time contrary comes from the habit or thoughtfulness for others. A homely but not without illustration is given in a story of the late King Edward, when Prince of Wales. He was dining with a party which included a man of little social position. During the meal the man poured his tea into his chamber pot, drinking, thus, directly from the Prince's table. The Prince, who had been told of this, said to him: "You are a very good fellow, but I had not noticed a better than a common table." *—*

A similar story of thoughtfulness is told of a certain English prisoner, who when a member of a party dropped and broke a cup, loaned directly himself a cup to use in the interim.

Using Sam Brown as a guide, we
went through the woods, to the top of
the mountain. The forest was very
thick and the ground was very
muddy.

The following remarks were made by Mrs. F. W. Jarman, mother of the little girl who was in the plane which crashed yesterday:

"I received Stanley M. Bruce last night a phone call from the secretary of the settlement of British immigrants in Australia, the woman having sent me a letter asking me to give free passage for my children and myself for one and half years to New Zealand or New South Wales for six months."

"That Canada's building and habits which I have seen are the same as in the British Empire. I am glad to see another country where we will find maintenance."

"We visited the mountains of British Columbia where they grow some of our best food."

MARKETS & LIVESTOCK

During the past several weeks all markets have been weakening under pressure of grain cattle. Unfinished wool calves are also moving in large numbers. While prices are still fair for the few real choice Export and Butcher cattle of grain feed, we advise holding back all half-cattle until the latter part of July at least.

A letter or phone call when you are selling will get first hand information, or we will look them over for you.

Abstract. The authors present a new method for determining the optimal number of clusters in a dataset. The method is based on the analysis of the change in the within-cluster variance as a function of the number of clusters. The results show that the proposed method is more robust than other methods and can be applied to a wide range of datasets.

... expanded revenues at the state level, and the two thousand spending cuts that could not have been made.

"I can't afford to take chances"

Is a remark often heard from parties who are in the habit of selling their Live Stock locally. The facts of the matter are that these parties by selling locally are assuming a great deal of risk.

There is a great deal of risk in selling locally. The price of live stock is constantly fluctuating and the seller is often at a loss to know what the market will do.

The safe way to sell live stock is to sell to a firm that will guarantee the price. This is the way to avoid risk and to get the best price for your live stock.

The Welcome Sign

"NOBODY asked you, sir," said the coy maiden. And in matters of buying, as well as in affairs of the heart, most people like to be "asked." Often, indeed, they insist on a proper invitation.

It is a new invitation which keeps the advertiser's name before the consumer in the form of ADVERTISEMENT in the home paper. These advertisements are the ADVERTISING that is most effective.

Mark up! Mark up! Hundreds of men and women are looking for the welcome sign in the form of ADVERTISEMENT in the home paper. These advertisements are the ADVERTISING that is most effective.

McLaughlin-Buick Special Bix 25-26

THE New Special Bix is a car you will wish to own.

The Business Coupe, for instance—the smart lines, the beautiful, quiet-toned Duco finish and handsome equipment, give it an air of smartness and style that is equalled by few cars, regardless of price.

Moreover, you will expect more from a car so outwardly so beautiful, will be more than fulfilled by this Coupe's performance. The 30 H.P. valve-in-head engine provides more than enough power for the hardest going in mud and sand. The sturdy chassis and cantilever springs, together with Low Pressure Tires, afford unusual driving ease and comfort—even on the roughest roads.

The increased safety of Four-Wheel Brakes adds much to the driver's peace of mind and enjoyment.

TO SELL WHEAT ON THE BASIS OF MILLING VALUE

Wheat, e.g., Yellow 1, being sold
on the basis of milling value, is
sold at a premium over the
market price. The milling value
of the wheat is determined by
the amount of flour it produces
per bushel. The more flour it
produces, the higher the milling
value, and the higher the price.

DOCTOR ADVISED AN OPERATION

Read Alberta Woman's Experience with Lydia E. Pinkham's Vegetable Compound

My dear friends, I am writing to you to tell you of my experience with Lydia E. Pinkham's Vegetable Compound. I have been suffering from a very bad case of constipation and biliousness for many years. I have tried many different remedies, but nothing has helped me. I have been advised by a doctor to have an operation, but I have been too afraid to do so. I have decided to try Lydia E. Pinkham's Vegetable Compound, and I am glad to say that it has helped me. I am now feeling much better, and I am able to do my work again. I am sure that it will help many other women who are suffering from the same trouble.

Prospects Are Bright

As the year draws to a close, and annual statements and reports of all kinds, a picture of prospects for 1935 is being painted. World Post War

If one leaves the judicial question to higher tiers of co-operation, it is clear that the principle of equity itself neither would demand a pooling of war expenses nor their distribution among the states proportionally to the damage each and without having as its basis the particular aggregate damage because of monetary losses.

Another argument for a redistribution of the burden of war costs is that the United States and the United Kingdom have collected taxes on income from the war years which they wish the enemy injured by the war to contribute to the payment of the debt incurred. The Federal Government has indicated that it will not do so.

While alfalfa is one of the known agricultural products of Canada, it is not generally known to be a high-value agricultural product.

In my opinion the secret of alfalfa is largely due to the Grimm seed being used, produced as near where you grow it as you can get.

It is simply about the Grimm and is exactly the same and comes from the stock.

Alfalfa, either as a seed or as a whole crop, is a very good thing to have for all kinds of use, and is a very good thing to have for all kinds of use.

Amesbury Still Hopes To Fly Over It

King's Bay, September 10.—Randal Amesbury and the other members of the expedition which recently made an all-Island trip to reach the North Pole by airplane from Spitzbergen, have returned to Oslo, Norway. They took with them the supplies which brought them back to the Arctic coast.

Amesbury told the Associated Press that he hoped to land at the North Pole on the 15th of the month. He would need a special permit to make a stopover, but he had no doubt of success. He would make a single stopover at the pole, landing in Alaska. For the project he had now gathered 10 additional and valuable pieces of equipment.

The meeting is presided over by William "Boss" McEwen, McEwen's usual being present brings about a sense of the problem to be solved. The speaker, David Wilson, a general manager in a public utility in another state, said:

After a year of intense negotiations, the two sides have agreed to a ceasefire. The agreement is a significant step towards peace in the region. It is hoped that this will lead to a lasting resolution of the conflict.

Societal Integration Project

The project was designed to help students understand the importance of community service and social responsibility. It involved a series of activities where students worked together to improve their school environment.

One activity was a "Clean Up Day" where students spent time cleaning up the school grounds. Another activity was a "Planting Day" where students planted flowers and trees around the school.

The project also included a "Service Project" where students visited a local nursing home and spent time with the residents. This helped them learn about the needs of the elderly and how they could help them.

Finally, the project ended with a "Reflection Session" where students shared their thoughts and feelings about the experience. They discussed what they had learned and how they felt about helping others.

RED ROSE TEA "is good tea"

The same good tea for 30 years. Try it!

Beware Of Dust

Once upon a time, in London, England, there was a small boy, who, after the fashion of the day, was called "Red Rose". He was a very healthy and happy child, and he was very fond of his tea. One day, when he was about five years old, he was taken to a doctor, who told him that he was suffering from a very serious illness, and that he must be kept in bed for a long time. The doctor told him that he must not eat any food that was not very good, and that he must not drink any tea that was not very good. The boy was very sad, and he thought that he would never get well again.

But one day, when he was about six years old, he was taken to a doctor, who told him that he was suffering from a very serious illness, and that he must be kept in bed for a long time. The doctor told him that he must not eat any food that was not very good, and that he must not drink any tea that was not very good. The boy was very sad, and he thought that he would never get well again.

Table 4 shows the results of the regression analysis. The results indicate that the regression model is significant at the 0.05 level of significance, $F(1, 10) = 10.00$, $p < 0.05$. The regression equation is $\hat{Y} = 0.0001X + 0.0001$, where $\hat{Y}$ is the predicted value of the dependent variable and X is the independent variable. The results of the regression analysis are presented in Table 4.

A True Story of Divine Intervention
Also people saw this unique photograph during two weeks at the Grand Theatre.

THREE ATTEMPTS WERE MADE TO HANG JOHN LEE - AND EACH ONE FAILED. THERE WAS NOT A GUNSHOT FIRED IN THE WHOLE PICTURE.

THE EASY WAY

(From Vancouver Sun)

One standard locomotive can hook on to 90 cars of grain at Edmonton and, except for 26 miles where the train is broken in two and hauled by two engines, that locomotive can haul those 90 cars of grain right into Vancouver. This is the record because it cannot haul half that number of cars east to Winnipeg or to Montreal.

On Wednesday, Oct. 14th, Allendale Ladies' Aid will hold their Annual Chicken Supper and Bazaar from 5.30 to 9 o'clock. Supper charges: adults 50c; children between 10 and 14 years 25c. There will also be a short program.

Ideal threshing weather with every machine working overtime.

Wheat Pool Campaign for New Members

Alberta grain growers are advised that the Alberta wheat pool has inaugurated a new campaign for membership and that this campaign is being conducted on a different basis than others in the past, either in Alberta or the two other prairie provinces.

The success of the last two years has encouraged the directors of the wheat pool to authorize a new campaign for members at this time. This campaign is now begun and it will be carried on till the end of the year. In the past all canvassing had been done voluntarily with no payment for services rendered, but President H. W. Wood and the board of directors feel now that it would be unfair to ask the workers of other campaigns, or new workers, to undertake further work along this line without some payment to offset the time lost and expense entailed in the task of securing contracts.

The Alberta Pool is the Province of Alberta wing of the Canadian Co-operative Wheat Producers, which is the selling agency for the three Western pools, namely, Alberta, Saskatchewan and Manitoba. The head office of this selling organization is at Winnipeg, with branch offices at Calgary, Vancouver, New York and Paris, France.

The combined membership of the three Canadian wheat pools is 110,000 and the volume of wheat handled in the past season was in excess of 80,000,000 bushels. It is estimated that the Central Agency will handle this year at least 140,000,000 bushels of wheat.

Objective of Present Campaign

The membership campaign which has now been started aims at raising the membership from 32,000 to 42,000, which, in the average of acreage, will bring the total acreage in the pool to 4,300,000 acres, an increase of 1,000,000 acres. The present administration can promptly and efficiently care for this increased volume of business. The pool stands higher than ever in the respect and confidence of the people of the province. Several thousand new members have been added by joining the pool without solicitation, simply on account of the good work it has done and the decided satisfaction of old members in the success of its operations. The objective set by President H. W. Wood and his associates in the administration of the pool's affairs can easily be reached if the friends of the pool set about the work promptly and actively and all who desire further information about the pool, in any department of its operations, can have this for the asking from the head office in Calgary.

The board of directors of the A. 20-12

That the offer of the Vermilion Branch of the Canadian Bible Society to place a Bible in each ward of the hospital be accepted.

The motion that the Board appoint standing committees was defeated.

Messrs. Doupe and Steele, councillors from the M. D. COMMUNICATION

(This paper does not hold itself responsible for the opinions expressed by its Correspondents.)

To the Editor,
The Standard, Vermilion.

Dear Sir,—

At the meeting called by the ratepayers to find out who was to blame for the small percentage of pupils passing out of the high school, it was amusing to some, particularly myself, who thought from experience that the blame was not distributed equally where it belonged—as usual the absent ones got it in the neck.

Those who presumed to know the reason blamed the movies, rink, C. G. I. T., amateur performances, dances, etc., all of which took up the time of the pupils after night fall: it was taken for granted that everything else was all O. K. There was nothing said about the books in use nor the class of book the children have to buy and study from, and the extra amount of nonsense that has to be examined into their noodles, all at one and the same time. The pupil starting into the so-called high school, or their parents have to pay \$12.00 for the first load of bunk to start with, when the class of rubbish that it is would be dear at three dollars. In my school days the teachers were employed to teach the children, there was no teaching done at home —no home work. It was against rules to take any book home from school except for repairs, all lessons had to be memorized at school.

There was some talk at the meeting about overcrowding in the school rooms. Now the school I attended was built right in the native bush, just the large trees cut down that would likely fall on the building; in the winter season we had an average attendance of 60 pupils of all grades; there was no thought of sanitation—that was unknown. All fresh air came in through the door or windows and nobody sick. Teachers were hired by the month, if their work was not satisfactory to the trustees they were fired; we had four different teachers within a year. Oh, what a difference between then and now. If we want the nation to prosper we must have more workers and less of this so-called "higher education."

P. G. PILKIE.

A letter to W. E. Sutton from Mr. V. J. Reed, stated that he and Mrs. Reed were at Barnstable and had been to London. A little later they were leaving for France, making a stop at Paris. Both were having a real good time and had not felt better for years.

Quality

The most urgent requirement in
Canada's Agricultural Products

CANADA produces every year large quantities of wheat, oats, barley, butter, cheese, bacon, beef, eggs, apples, potatoes, grass seed and clover seed that the world needs. Her natural wealth of minerals, her forests and her lakes, her rivers and her coast, her great cities and her districts of low cost, green Britain—the one great flourishing country of the world with an open market.

Unfortunately, nearly every other country with any surplus of food products seems to want to send its surplus to the open market.

The heaviest of the competition is on this, our only market, and the energy and rearmament of our competitors has been a heavy burden to us. The Government of Agriculture some time ago, but it is only within very recent past that the real and only agricultural problem has been discovered, or at least put into relief. This lay in the fact that we believe, as do the rest of the nations of the world, that the "great problem" of our agricultural production is the policy and practice that is now in vogue on the whole of the world's farms.

"Grading" means the classifying of produce, whether they be eggs, butter, cheese, eggs or anything else into what might be called in a general way **BEST**, **"GOOD"**, **"FAIR"** and **"POOR"** classes.

These exact words are not used in counting the grades, but that is what is meant. The **Inspector** **settles** in **Windsor**.

ing is threefold—

- (1) **Educational.** When the producers own the relative quality of his product he is spurred on to maintain that quality is it is the "best" or to improve quality where necessary.
- (2) **Fair Play.** When producers are not graded the inferior article for export, the quality of the entire output is lowered. When the quality of the product is graded, the inferior article is sold in the domestic market, thus keeping the quality of the export high.
- (3) **Export Promotion.** When the quality of the product is graded, the inferior article is sold in the domestic market, thus keeping the quality of the export high.

The **WOLFE** is superior quality, clean-ness and weight. Brandfasting Canadian eggs have established confidence between producer and consumer and between exporters and British importer and has resulted in a greatly increased demand for the Canadian egg both at home and abroad. Other products are mentioned.

Canada now grades her cereals, grass seeds, hay, better apples, eggs, butter, cheese, wool and bacon hams. The results have been in every case beneficial to some cases quite markedly.

...even though the grading system has been in effect in some cases for only two or three years, thus:—

Choice—Grading began April 1st, 1912. Canadian cherries the year before and fallers lose such sales on the British market that New Zealand cherries are usually preferred. **Today** Canadian cherries command some 20 per cent. more than New Zealand.

Quality Counts—Quality is the first objective for the Canadian exporters, and the grade, which is the longest-lived and the most profitable, is the one to which they are most anxious to attain.

Grading enabled us to do this for cherries, wheat, eggs and apples.

Grading is helping us to do it for better and basins.

Quality Counts

Quality is the first objective for the Canadian exporters, and the grade, which is the longest-lived and the most profitable, is the one to which they are most anxious to attain.

Butter—Grading began same time for cheese. The reputation of our best was then needed as low ribb Canadian butter today, while not the best on the market, is rapidly improving in quality and gaining in reputation.

Hogs—Over two years ago the Department of Agriculture has been

Advising that in making up a good animal stock, and the raising of the best hogs, is the only way to get the most profitable results. This is a very important point, and one that should be kept in mind by all who are engaged in this business.

A LOVE EPIC OF THE FAR NORTH

CHAPTER IV—Continued
The first thing that struck him when he stepped out of the train was the cold. It was a sharp, biting cold that he had never experienced before. He pulled his coat tighter around him and walked quickly towards the station entrance. The air was filled with the sounds of people moving about, but he felt isolated, as if he were the only one there.

CHAPTER IV—Continued
He looked around him, trying to get his bearings. The station was large and modern, with high ceilings and ornate decorations. People were walking in all directions, some in a hurry, others more leisurely. He felt a sense of disorientation, as if he had entered a new world. He tried to remember the directions he had been given, but the information seemed to be slipping away from him.

CHAPTER IV—Continued
He decided to wait for a moment, looking for someone who might be able to help him. He scanned the crowd, but no one seemed to be looking at him. He felt a growing sense of anxiety. What if he had come to the wrong place? What if he had lost his way? He needed to find someone who could guide him to his destination.

CHAPTER IV—Continued
He started to walk again, his feet feeling numb from the cold. He was still looking for someone to help him, but the crowd seemed to be moving faster now. He felt a sense of urgency, as if he had to find his way quickly. He tried to focus on his goal, but the cold and the unfamiliar surroundings were making it difficult for him to concentrate.

CHAPTER IV—Continued
He was still walking, his mind racing. He needed to find a way out of this place. He looked back over his shoulder, trying to see if he could spot anyone who might be able to help him. The crowd was still moving, but he felt more lost than ever. He needed to find a way to get out of there, to find his way back to where he belonged.

The Political Situation

St. Lawrence Dairy Industry

The growth of the dairy industry in Vermont is well illustrated by a comparison of the figures for production in 1910 and 1921. In 1910 the total amount of dairy products produced in Vermont was 1,000,000 pounds, valued at \$12,000,000. In 1921 the total amount of dairy products produced in Vermont was 1,500,000 pounds, valued at \$18,000,000.

Higher Than 1925 and the Five Year Average But Less Than 1923

The estimated production is within 31 per cent of the world 1925 average 2,484,517,000 bushels. This 196,256,000 bushels more than the production of 1923 in three countries, a total 141,119,000 bushels greater than the average annual production for the years 1919 to 1923. These three

"I got a long time I was a sufferer from rheumatism which led to my leg and down by leg to knee. At times the pain was so that I could not walk. I tried opiate and aspirin but without effect more than more temporary relief. I did as advised and using a few boxes there was no doubt a great reduction. Not only

More Moments For the Child

Interposed Parents Can Do More for the Child Than Anyone Else

Today the parents of 'unadjusted' children are being asked to look over their children in the light of the child's own needs and expect the parents to do the things that buy their children's adjustment. The parents are asked to be more understanding of their little children's needs and to be more understanding of their little children's needs and to be more understanding of their little children's needs.

Christmas Greetings

To All Our Readers,

A Right Merry and Joyous Christmas

Editor and Staff

Joy to the world! The Lord is come;
Joy to the world! The Lord is come;
Let every heart prepare Him room,
And heaven and nature join.

Joy to the world! The Son of God is born;
Let us adore Him, Christ the Lord;
Whom fields and rocks, and trees, and hills,
Repeat the coming story.

He rose to die and narrow grave,
He came to break the ground;
He came to set the captives free,
For to the captive is bound.

He rules the world with truth and grace,
And makes the nations pure;
And knows the secrets of the heart,
And wondrous things of old.

—Dr. Isaac Watts.

Standard Operating Procedure

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the situation.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources and timeline needed to complete each task.

4. The fourth step is to implement the plan. This involves assigning tasks to team members, providing support and guidance, and monitoring progress to ensure that the project is on track.

5. The final step is to evaluate the results of the project. This involves comparing the actual outcomes to the objectives and goals, identifying any areas for improvement, and documenting the lessons learned for future reference.

By following these steps, teams can effectively manage projects and achieve their desired outcomes.

The following table shows the results of the survey conducted in 1998. The table is divided into two main sections: "Total" and "By Region". The "Total" section shows the overall results, while the "By Region" section shows the results for each of the four regions: North, South, East, and West.

| Response | Total | North | South | East | West |
|-------------------|-------|-------|-------|------|------|
| Strongly agree | 15 | 10 | 12 | 18 | 10 |
| Agree | 35 | 25 | 30 | 35 | 25 |
| Disagree | 25 | 20 | 22 | 20 | 25 |
| Strongly disagree | 10 | 12 | 10 | 10 | 10 |
| Don't know | 15 | 15 | 15 | 15 | 15 |

The table shows that the majority of respondents (50%) agree or strongly agree with the statement. The "Strongly agree" category accounts for 15% of the total responses, while the "Agree" category accounts for 35%. The "Disagree" category accounts for 25% of the total responses, and the "Strongly disagree" category accounts for 10%. The "Don't know" category accounts for 15% of the total responses.

The "By Region" section shows that the results are relatively consistent across the four regions. The "Strongly agree" category is highest in the East region (18%), while the "Strongly disagree" category is highest in the North region (12%).

FIRE THREATENS OUR NATIONAL HERITAGE

Carelessness Destroys 3,000,000 acres annually of Canadian Forest

Loss of standing timber by fire continues to be appalling. On the average, over 3,000,000 acres of forest land are destroyed annually. The forests of Canada are being depleted at a rate they cannot possibly withstand; more than half of this depletion is due to fire, insects and decay. The future of the forest industry is just as dependent on the healthy and young growth as the pulp and paper and lumber mills are dependent on mature timber — both must be saved from the ravages of fire.

In addition to the wastes suffered by the forest and the stock, efforts in forested regions are vitally dependent on the woods for their employment. Can with fire in land-clearing operations in all-essential — burned timber lands no longer.

FOREST AREA

Over three-quarters of the land area of Canada is forested or covered by brush. The forested area of Canada is being depleted at a rate they cannot possibly withstand; more than half of this depletion is due to fire, insects and decay. The future of the forest industry is just as dependent on the healthy and young growth as the pulp and paper and lumber mills are dependent on mature timber — both must be saved from the ravages of fire.
